

## **ECP/PWD Participation in iFEST 2020**

Enterprise Classroom Program (ECP) and Quartermaster School, Petroleum, and Water Department (PWD) co-authored an article in the National Training and Simulation Association (NTSA) February Newsletter titled *“Leveraging Emerging Classroom Technology to Improve Learning in the Army.”* This article highlighted the collaboration, capabilities, and outcomes of leveraging the Army Virtual Learning Environment (AVLE) for PWD courseware improvements and ECP provided technology. This facilitated ECP & PWD to co-produce and provide a pre-recorded iFEST presentation showcasing the capabilities provided through ECP’s, PWD’s, and the Directorate of Distributed Learning’s (DDL) collaboration. ECP also provided the original article, their Brochure and a preemptive Questions and Answers (Q&A) document to proactively answer some of the most common questions regarding this pilot. ECP received positive comments on the presentation to include the embedded videos.
